EXPERIENCE

Senior Front-End Developer
2010 - Now

OVERTEAM, ISTANBUL

Mentored and trained 4 junior Front-End Developers in 8 years.

Responsible for all aspects of frontend architecture and development, including business focussed trade-offs around technology, features, quality and strategy.

Worked with the team of Designers and Back-End Developers to gather requirements and enhance the project's functionality and add new features.

Developed the UI, layout and Front-End programming for the web applications using HTML, CSS, jQuery and JavaScript that matches requirements.

Responsible for all client side UI Validation, custom validations and implementing Business logic based on user selection using JQuery UI and ReactJS.

Involved in developing the responsive web pages for mobile, tablet and desktop using CSS3 Media queries.

Front-End Developer
from Junior to Senior
2008- 2010

MADEBYCAT, ISTANBUL

Deciding Information Architecture for clients, building websites.

Front-End coding and CMS integration of new projects. Maintenance support for live projects

Created HTML e-mail templates for e-mail marketing.

Tested Front-End code in multiple browsers to ensure cross-browser compatability.

Fixed Front-End bugs (HTML, CSS, jQuery)

Researched industry trends and websites to provide top quality design.

Workflow tools included: HTML, CSS, Javascript and SVN
